VERTICAL BLIND SYSTEMS

The play of light

Vertical blind systems by Silent Gliss are the perfect union of design and technology that allows you to precisely control the amount of light that enters the room, creating a unique atmosphere in every space. Vertical blinds are particularly well-suited for floor-to-ceiling windows. The high-quality materials and unique color range allow endless options which can be adapted to your individual needs.

EASE OF USE, SAFETY AND QUALITY FLOW TOGETHER

The high-quality vertical blind systems remain popular due to their sophisticated technology. Whether motorized or operated by hand, the design allows for precise adjustments in positioning. Simple operation is guaranteed!

VERTICAL BLIND SYSTEM SG 2810 WITH CHAIN OPERATION

- Profile can be horizontally bent (small bending radius of 75 cm)
- Simple mono-operation with ball chain for opening-closing-rotating
- Chain override to prevent damage during use
- System can be recessed into the ceiling

VERTICAL BLIND SYSTEM SG 2900 WITH CRANK OPERATION

- For sloping roofs up to max. 53°
- Robust, bendable profile (small bending radius of 50 cm)
- Hand crank for continuous opening-closing-rotating
- Gear drive with override protection
- System can be recessed into the ceiling

VERTICAL BLIND SYSTEM SG 2950 WITH ELECTRICAL OPERATION

- For sloping roofs up to max. 53°
- Robust, bendable profile (small bending radius of 50 cm)
- Operation at the push of a button for opening-closing-rotating
- Gear drive with override protection
- System can be recessed into the ceiling

SLOPING ROOF? NO PROBLEM!

The vertical blind systems SG 2900 and SG 2950 are suitable for sloping systems up to a 53° incline.

Like calm waters

WHEN THE LIGHT HITS THE WAVES

In collaboration with European textile designers, Silent Gliss enhanced their laser-cut vertical blind systems by adding breathtaking 3D appearance. The eye-catching louvres offer an exclusive design with stunning lighting effects.

Vertical Waves are the pinnacle of ambitious design when used as blinds or a room divider.

The Vertical Waves designs

ANDREA: WAVE INTERPLAY

The wave design runs in opposite directions, enchanting every room with a distinctive interaction between light and shade.

EXPERIENCE THE WAVE INTERPLAY, NOW IN 3D

Patterned Vertical Waves in the Andrea design add an intriguing accent to any room. The interplaying wave design creates different effects from every angle.

Laser-cut polyester
Trevira CS,
width 125–250 mm
(127 mm/5 inch louvres),
width 89–178mm
(89 mm/3 ½ inch louvres).

Laser-cut polyester
Trevira CS, height
218–297 mm (127 mm/
5 inch louvres). Printed
on Multi Visio fabric in
all RAL colours except
white, pearl and fluores-
cent colors (dark colors
recommended).

ANNIKA: THE GIANT WAVE

The jagged shape breaks up the light on the Vertical Waves, producing a distinctive lighting experience.

MARIA: THE FLOWING WAVE

The soft waves create a calm, harmonious atmosphere in every room that can be further enhanced using color of the louvres

Laser-cut polyester
Trevira CS,
width 125–130 mm
(127 mm/5 inch louvres).

Laser-cut polyester
Trevira CS,
width 125–250 mm
(127 mm/5 inch louvres),
width 89–178 mm
(89 mm/3 ½ inch
louvres).

The image shows a vertical blind system. On the right side, there is a teal-colored fabric slat with a fine, woven texture. To its left is a white fabric slat, also with a similar texture. The two slats are positioned vertically, one above the other, demonstrating the product's design and material quality.

WHEN TASTE MEETS TECHNOLOGY

Silent Gliss stands out for its quality window curtain and blind systems, which are based on outstanding technology and are of the highest quality.

Silent Gliss uses flame-retardant fabrics certified by Oeko-Tex®.

Harmonize your modern living with vertical blind systems in a range of colors.

The Architects of Silence

Silent Gliss is the leading global supplier of premium interior window treatment systems.
