# WINGED TRACK

The new Recessed Winged Track for your window treatment needs - Part 1: Curtains / Roller Shades

20

20

F-16

**Sampson Mills Ltd.**

# **Curtains**

## **WINGED TRACK**

The new F-16 and F-22 for manual curtain solutions will achieve a flush and sleeker look. It is pleasing to the eye both with and without a curtain as it is flush with the ceiling, allowing for a modern and complete design.

The other benefit is that all winged models, including the new A16, coming soon, will look exactly the same after the track is mudded to the ceiling.

**F-16 - Best for ½" or greater sheet rock for medium to heavy duty applications.**

**F-22 - Great for ¾" sheet rock for heavy duty Ripple-fold roller carriers.**

**A-16 - Motorized solution coming soon...**

**Sampson Mills Ltd.**

# Roller Shades

## WINGED CHANNEL

The F-16 and F-22 tracks have multiple functionality. In addition to their use as a curtain track the same profile can be used for a recessed roller shade channel.

The added benefit is the \*Auto-Corrective-Technology and \*Fabric-Friendly-Technology, protecting the fabric from getting damaged if it falls out of the channel and it automatically goes back into the channel after a full open close rotation.

Stops 99% of side glare when using solar fabrics and stops 99% of light when using blackout fabrics.

For motorized and manual operation.

99% Blackout  
Glare reduction

**Fabric-Friendly-Technology: Allows for accidental pushing out of the channel without damaging the fabric.**  
**Auto-Corrective-technology: Automatically returns the fabric in to the channel if accidentally pushed out, after a full rotation.**

# The Installation

F16 brought to you by Sampson Mills Ltd.

## EASY INSTALL

- 👁️ Cut a ½" channel into your sheetrock
- 👁️ Apply adhesive, such as (PL 400) or other, under the flanges. (optional but recommended)
- 👁️ Press track down into sheetrock and wipe away excess adhesive with damp cloth (if applicable)
- 👁️ With a Nail gun shoot nail into the flanges
- 👁️ Use standard fiberglass sheetrock tape
- 👁️ Apply ½" painter's tape above channel
- 👁️ Plaster - Sand - Paint
- 👁️ Remove painters tape and \*Presto\* you're done

## THE WINGED TRACK

**Sampson Mills Ltd.**

Your new modern profile discreetly integrated into your home so that you can't see it.  
Thank you for making us part of your designs, projects, and homes...

Sampson Mills Founded in 2011 began with the idea that quality fabrics should be made at affordable prices. A lot has evolved as you would expect of an innovative company.

Since inception Sampson Mills has always worked with developers, architects and designers for specifications of projects with an ear close to the ground. Sampson took this even further with our consulting program. We help your firm decide on the best window treatment solutions for your space with our dedicated consulting team. We work on Hospitality, Healthcare, Residential, Cruise line, Aero, as well as many other project categories. This allowed us to listen to what is lacking in the market and gave us the ability to fill the void, through our dedicated specialists. If you ever need a solution we'd be happy to discuss the steps of making them a reality.
